

3D Navy Yard Buildings

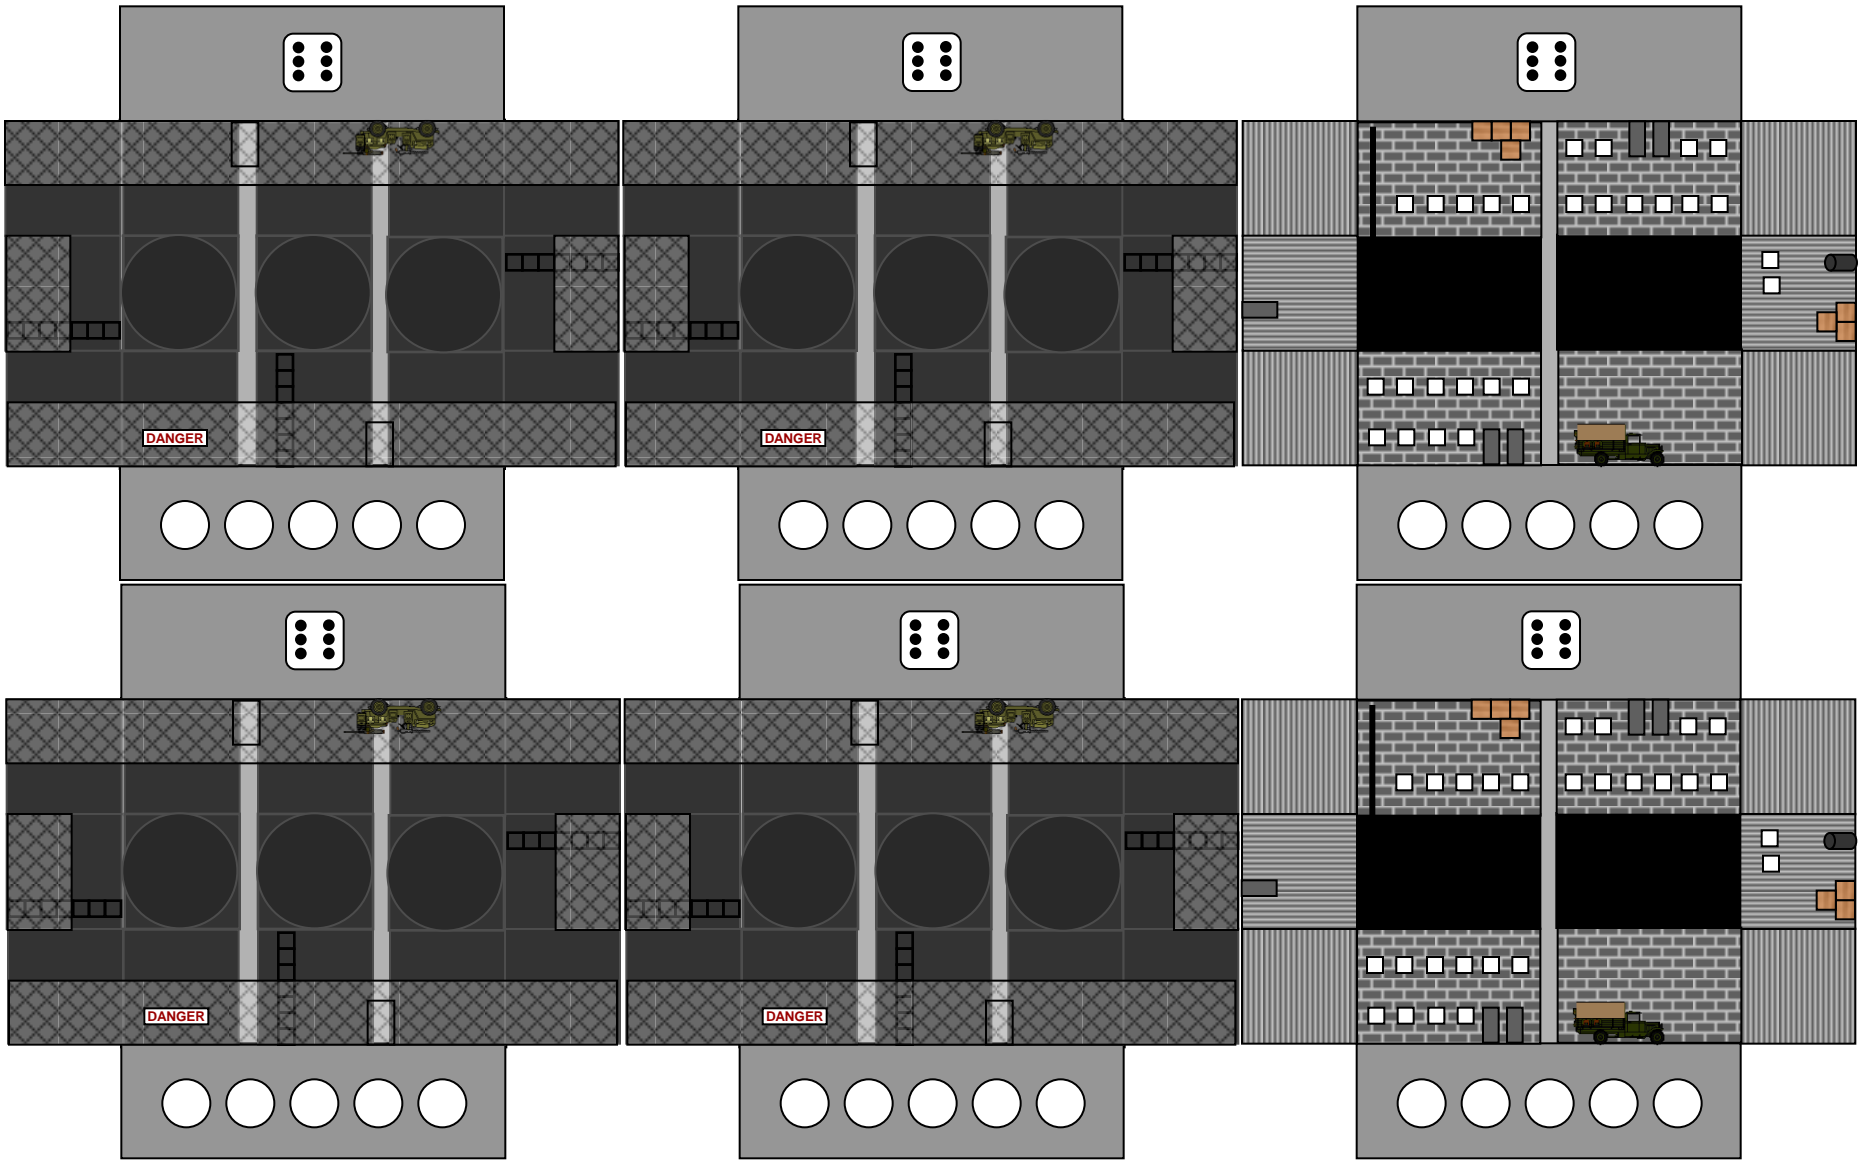

Assembly Instructions

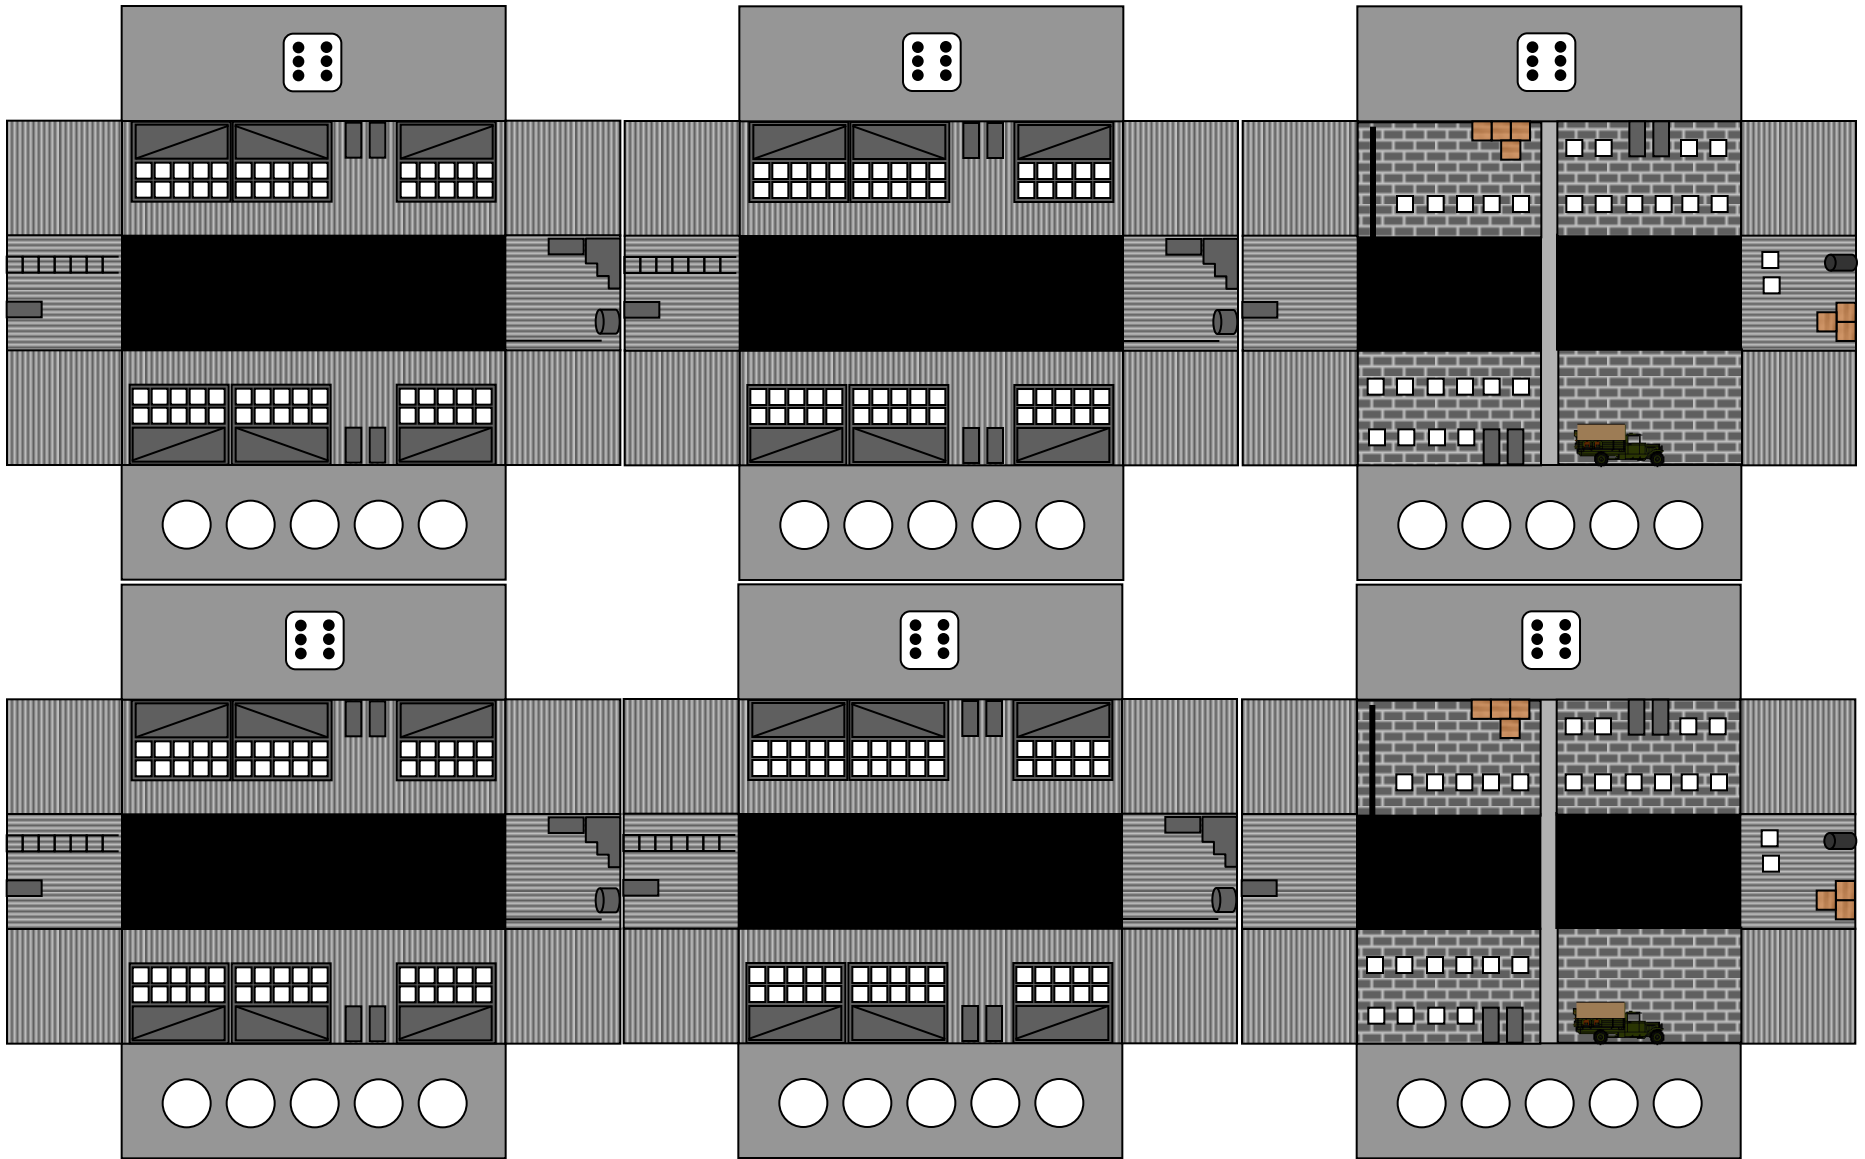

Designed by Pete Pellegrino

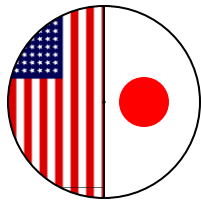

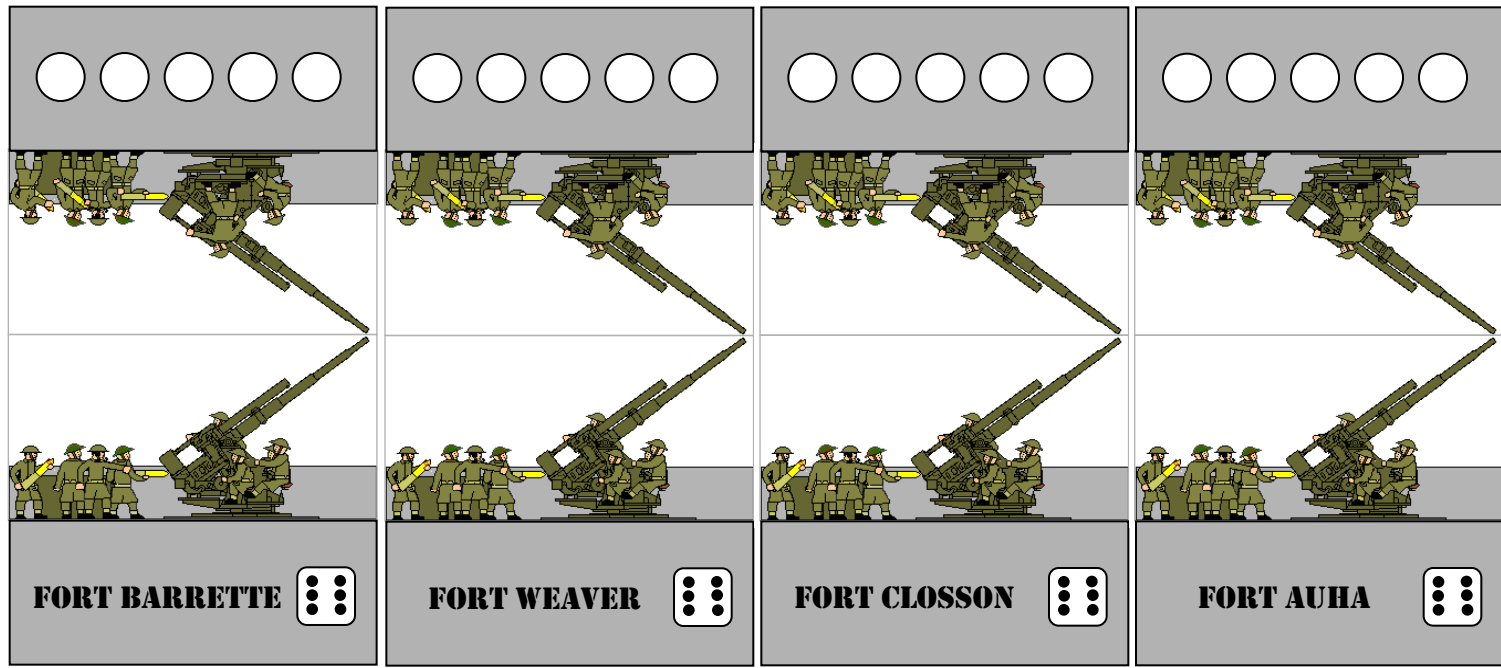

Buildings come in three types, fuel/oil tanks, machine/repair shops, and hangar/warehouse. Assembly is the same for all.

1. Cut out outline of building.
2. Snip along dashed lines.
3. Fold up sides and roof into upside U
4. Fold in side flaps (a), fold down end flap (b).
5. Tape or glue flaps in place. If gluing, use paper clip to hold flaps in place until dry.
6. Hit circles can be covered with transparent tape and dry erase markers used to record damage.

Marker for use with Turn Tracker. Can also use coin, poker chip, etc.

Use these markers to indicate appropriate search sectors on day of attack.
